

10 products, custom-tailored
in one comprehensive solution
straight from the developers:

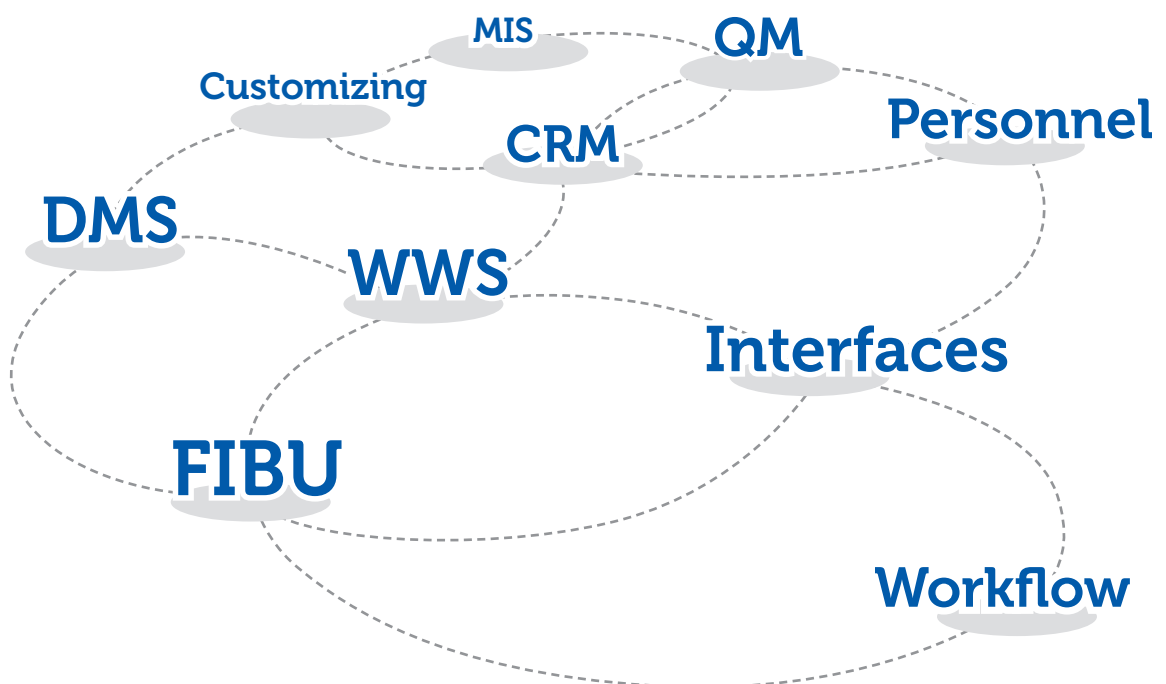

TopM r6!

r6

10 products in **one solution**:

With r6, we have implemented a fully comprehensive and integrated software solution for manufacturing companies that includes the functionality of 10 domains. The complete solution has been developed in one comprehensive interface, reflecting our holistic product strategy through end-to-end in-house development. The flexible design of r6 allows for use in various industry sectors, company sizes and trading Sector (B2B/B2C/Export).

WWS	Enterprise Resource Planning System

CRM	Customer Relationship Management
DMS	Document Management System
Workflow	Workflow Business Organisation
FIBU	Certified Financial Accounting
Personnel	Personnel Time Recording and Administration
MIS	Management Information System
QM	Quality Management

Katrin Herger, Product Manager

Custom-tailored, yet updateable

r6 safeguards your individuality and flexibility in the market. Thanks to convenient tools, the r6 software can be customised and configured according to your industry's or company's specific needs – either by you or by us.

Mask editor

All screens can be customised to your preferences. You can move, hide, minimise or maximise input fields and buttons. You can rename selected fields, make them mandatory, etc. This can be done for the entire company or for selected users or groups of users.

Form generator

Print forms (such as invoices, orders, work schedules, etc.) are aligned to your company's forms via drag and drop. Any information can be displayed or hidden.

List generator

Create and save your own lists and evaluations with cross-table computational functions – it's quick and easy. Departments will be provided with those lists on a module-specific basis.

Parametrisation and configuration

Countless switches and tables in the programme setup control the processes and requirements in your application. You can control access to the various information sections through company-specific user profiles.

Customer modules

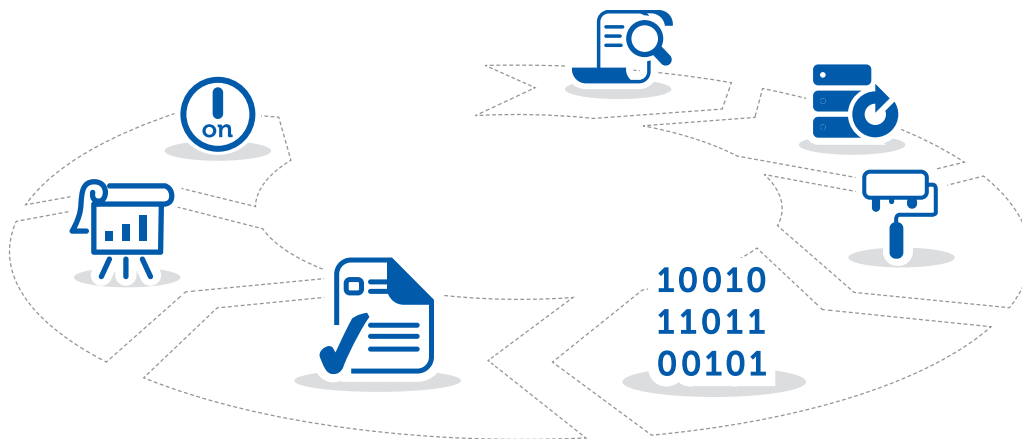

Additional functionalities (e.g. special offer calculations) can be implemented through the integration of customer-specific programme sections.

Languages

All display masks, programme notifications and forms can be made available multilingually. A simultaneous use of several languages is possible.

7 steps to a successful project

r6 is more than just a piece of software – its success is based on cooperation. We provide your company with advice and support. With TopM's r6 implementation strategy, success is guaranteed – as are short implementation periods.

1. Analysis

First, your processes and requirements are evaluated and established. We contribute our expertise to your company.

2. Data transfer

r6 features standard interfaces, and TopM has expertise in application and database systems.

3. Customising

We customise our r6 software for you. Custom-tailored forms, masks and processes are only a matter of a few clicks.

4. Programming

TopM programmes functionalities according to your requirements. These functionalities are integrated into the programme core to ensure they are maintained during updates.

5. Test run

Prior to going live, your company process will be simulated with your data to ensure a flawless implementation of r6.

6. Training

We train your staff in our headquarters or in your company's offices – with TopM's own mobile training network.

7. Implementation

We are there when your software goes live. Only that way can problems be solved and specific topics reinforced or programmed if required.

TopM stands for TopService

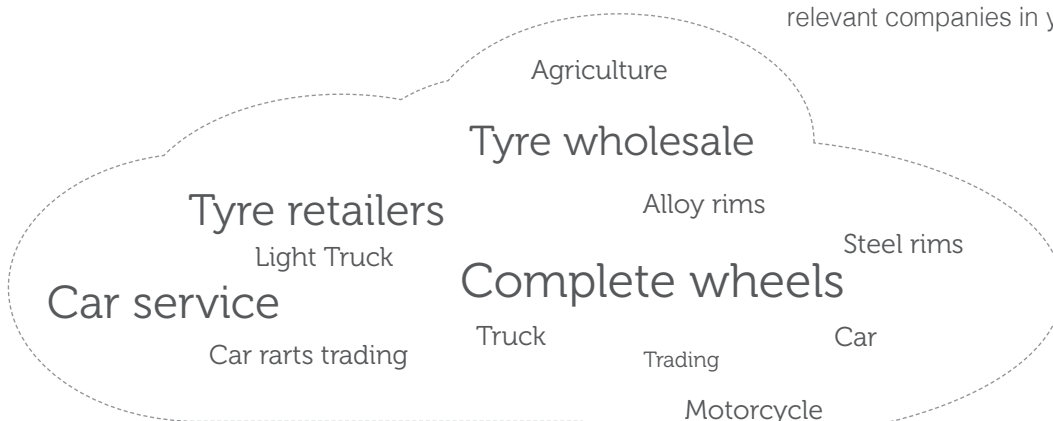

Our customers are important to us. Through close cooperation, we have been able to develop r6 as a piece of software with a focus on practicality. Benefit from the flexibility of direct support by the software providers and the opportunity of contributing to your software's continued development. As part of our service contract, you can avail of the following services:

- ☒ Continuous development of our r6 solution
- ☒ Free updates for all advanced versions
- ☒ Implementation of customer-specific requirements as part of general developmentg
- ☒ No discontinuation of product families
- ☒ Customer support hotline
- ☒ Remote Support
- ☒ Personal project manager
- ☒ Group seminars & follow-up training

References

Customer satisfaction is our number one priority. Our annual satisfaction surveys confirm that we are on the right track. Please feel free to contact our customers. We can facilitate contact to industry-relevant companies in your vicinity upon request.

r6 with a large range of

Order and billing

Offer management

- Offer management
- Enquiries
- Offer generation
- Offer dispatch / Print
- Offer dispatch / email with PDF
- Offer tracking
- Availability calculation
- Offers archiving
- Duplication of offer
- Availability calculation

Commercial orders

- Orders
- Order confirmation
- Order confirmation / Print
- Order confirmation / email with PDF
- Contract based order
- Part delivery
- Credit limit check
- Customer notification via text message and email
- Pro forma invoice
- Contract splitting
- Contract disposition

Delivery

- Delivery note
- Collective delivery note
- Shipping documents
- Shipping labels
- Freight costs
- Package tracking
- Dispatch confirmation via email
- Interface to GLS, DPD and UPS
- Distribution check with barcode scanner
- Custom and export documents
- Pick list
- Loading list
- Route plan

Invoicing

- Invoices
- Credit entries
- Lists of outstanding items
- Payment reminders (single)
- Reminder list
- Collective invoices
- Payment cycle SEPA
- Payment receipt
- Reminder cycle
- Invoice processing
- Advance invoices
- Registration of export
- Intrastat reporting

Materials management

Stock and item management

- Stock list
- Calculation basis for stock list
- Technical data
- Item adjustment
- Stock levels
- FIFO storage management
- Item history
- Special-offer price
- Price list 1 - 50
- Automatic item export
- Pricing
- Price development (sales, purchasing, calculation basis)
- Parts catalogue

Staff

- Employee data

Access your data anywhere: **ASP technology**

Work on the move via UMTS or connect your branches via ASP technology - with the same environment and speed as in your headquarters without terminal / VPN connection. TopM's own protocol guarantees maximum security with minimum requirements. Alternatively, you can choose browser-based access to your data.

Web connection

Info accessible
through your
website!

Company

Your branches are
fully integrated.

Sales force

Make your sales
and service teams
mobile.

r6 App

Access important
information anytime
on your Smartphone.

HomeOffice

Be flexible and work
from home if required.

Software from the developers: **TopM**

TopM was founded in 1991 and is dedicated to developing and supporting software solutions for a variety of industries. With more than 65 permanent staff in 5 target-group-oriented teams, TopM supports more than 1,700 customers throughout Germany.

Software straight from the developers

TopM exclusively sells solutions developed in-house. Support is provided directly by our software developers. This allows us to provide top-class expertise and maximum flexibility in using and customising our solution to your individual needs.

ISO 9001 certified quality

Through consistent implementation of the criteria according to ISO 9001:2008, TopM has created the necessary conditions to ensure high quality. Among the key elements are development management, automated product tests, analysis of offers and complaints processing.

Independent and flexible

TopM is an owner-led company free from external investors. As a consequence, we are free to make our own decisions based on our clients' needs, rather than corporate requirements.

Diversity of industries

TopM offers a range of solutions for various industries. You can benefit from the synergy effects of comprehensive development ensuring low prices. Having established itself in different industries, TopM has become a reliable partner, even in a difficult economic climate.
